TECHNICAL BULLETIN

MODEL 4200

SPRING LOADED PRESSURE/VACUUM VENT WITH PIPE-AWAY

OVERVIEW

The Model 4200 Spring Loaded Vent provides pressure and vacuum relief in applications where higher pressure settings are required and that require vapors to be piped away.

SPECIAL FEATURES

Modular:

The Model 4200 pipe-away conservation vent is part of the Valve Concepts, Inc. modular vent product line. The Model 4200 can easily be converted to a vacuum only vent or end-of-line pressure / vacuum vent and can either be direct acting or pilot operated. Only Valve Concepts, Inc. offers complete modularity throughout its complete vent product line.

Maintains Accurate Settings: The minimum pressure setting is .5 oz./ in² and the minimum vacuum setting is .5 oz/ in². Maximum pressure setting is 15 psig and maximum vacuum setting is 15 psig. Lower settings may require weight loading instead of springs on vacuum side. All vents are tested to Valve Concepts, Inc. high standards for both leakage and set point prior to shipment. A certified test certificate is included with each vent verifying the accuracy of both the pressure and vacuum setting and leakage. A leakage rate of less than 1 SCFH at 90% of set point is verified for both pressure and vacuum.

Condensate Drainage:

Self-draining housing body and drip rings keep condensate away from seating surfaces, preventing freezing, binding and clogging.

Air-Cushioned Seating:

Air-cushion seating provides tight sealing to reduce evaporation losses and the release of toxic vapors into the outlet piping, except under normal breathing conditions. The pallets have outer guiding and center stabilizing stem to provide self alignment and tight seating.

TECHNIQUE

A spring loaded pallet on the pressure side of the vent allows the discharge of vapors to the outlet piping when the tank pressure exceeds the set point and a weight loaded/spring pallet on the vacuum side of the vent allows the intake of air when the tank vacuum exceeds the set point. The pallets open and close to regulate the tank pressure within permissible limits to avoid damage to the tank as the tank normally breathes due to the thermal changes or product movement. Virtually eliminates the intake of air and the escape of vapors, except during normal tank breathing, thus reducing product loss.

MODEL 4200

LINE SIZES AVAILABLE

2" (DN50), 3" (DN80), 4" (DN100), 6" (DN150)

CONSTRUCTION

Housing Material: The Model 4200 is a rugged design made to last. Available in Aluminum, Carbon Steel, or 316 SST.

MATERIALS OF CONSTRUCTION					
Series	Housing	Pallet			
4200CS	CS	316 SST			
4200SST	316 SST	316 SST			
4200A	Aluminum	316 SST			

FEP-TFE:

Diaphragm

Sizes and Connections: Available in Sizes 2" through 6". CS and SST vents have Raised Face Flange, Aluminum vents have Flat Face Flange to mate with standard ASME 150# flange connections. On sizes 2" through 6", the Model 4200 is available with the same size inlet and outlet to reduce outlet piping cost.

Pallet Diaphragm Material: FEP TFE is Standard. Also available Buna-N, EPDM or Fluorocarbon Elastomer (FKM).

STANDARD/GENERAL SPECIFICATIONS

Standard: Exterior coating will be a Gaskets: Painting: Standard: TFE/TFE Rope

combination of Cashco Paint Specs #S-1777 epoxy and #S-1743 powder coated. fasteners, seat surfaces and corrosion

resistant parts excluded. -400° to 400° F (-240° to 204°C)

Temperature Limits: Fluorocarbon Elastomer – (FKM):

-20° to 400° F (-28° to 204°C)

Buna-N (Nitrile-NBR):

-30° to 200° F (-34° to 93°C) EPDM (Ethylenepropylene): -40° to 225° F (-40° to 107°C)

Pressure & Vacuum Ranges:

See Table 5 and Table 7 on the coder. Differential Pressures greater than 2 psid will limit the minimum vacuum set

point to 2 oz/in².

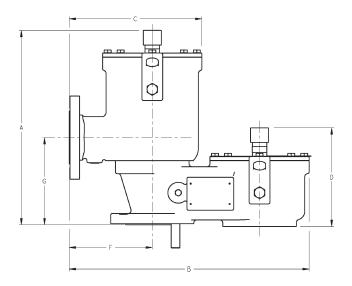

OPTION SPECIFICATIONS

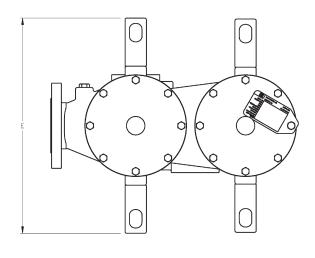

BUG SCREEN - 304 stainless steel, 4x4 welded mesh.

FLAME SCREEN - 304 stainless steel, 30x30 woven mesh
