

## **Declaration of Conformity**

### **acc. To REACH regulation and SCIP database**

REACH is the European regulation for Registration, Evaluation, Authorization and Restriction of Chemicals. REACH aims to ensure a high level of protection of human health and the environment from risks that can be posed by chemicals.

Ramén Valves produce and sell valves. Ramén Valves purchase and use chemical compounds and preparations from within the EU and use them as intended in the Safety Data Sheet. Ramén Valves do not manufacture any substances or preparations.

The SCIP database shows chemicals that are no longer to be used, manufactured and spread on the market. This database is continuously updated by authorities.

Ramén Valves is continuously monitoring this list of candidates and keep it updated to ensure conformity to the actual legislations. Ramen Valves by that means ensure conformity with these regulations, and ongoing deliveries in respect of the REACH and SCIP database.
